Work Experience

Software Developer Intern, Digital Nomads, LLC (Internship), Skopje, North Macedonia
June 2025 - August 2025

Education

Natural Sciences and Mathematics Program, High School "Kosta Susinov" - Radovish (5.00)
September 2017 - June 2021

Software Engineering Student, Faculty of Computer Science and Engineering, Ss. Cyril and Methodius University in Skopje (7.90)
October 2021 - Present

Projects

Semantic Web-Based Public Procurement Analysis System
Developed a web platform for analyzing public procurement data in North Macedonia using RDF, SPARQL, and Django. Focused on ontology-based data structuring and interactive visualizations. | Presented as a student paper at the CIIT Conference.

Machine Learning-Based Stroke Risk Prediction
Built a Python system using scikit-learn and pandas to predict stroke risk from patient data. Implemented data preprocessing, visualization, and model evaluation. | Presented as a student paper at the CIIT Conference.

Distributed Microservice-Based System for Managing Master's Theses at FCSE
Designed and implemented a distributed system using Spring Boot, Docker, and RESTful APIs, following Domain-Driven Design and Service-Oriented Architecture principles.

Laravel API Testing Application
Developed automated tests for a Laravel-based API, improving reliability and performance through structured QA practices.

Online Art Gallery Web Application
Created a C# / .NET web application for managing and showcasing artworks, featuring artist profiles and user interactions.

Edge Detection Algorithms in Digital Image Processing
Implemented and compared multiple edge detection algorithms using Python, analyzing performance and visual accuracy.

Science Travel Grant System (STGS)
Developed a system for managing travel grants for scientific research, focusing on requirements analysis and software documentation.
